Summary — Full Stack MERN Developer with hands on experience building scalable web applications using MongoDB, Express.js, React.js, Node.js, and Next.js. Strong foundation in Data Structures, Algorithms, OOP, and problem solving. Experienced in developing production ready systems including ecommerce platforms, lead generation websites, authentication systems, and RESTful APIs. Focused on writing clean, maintainable code and collaborating in Agile teams to deliver high performance applications end to end.

Skills

Frontend React.js, Next.js, HTML5, CSS3, Tailwind CSS, Framer Motion, GSAP, Three.js
Backend Node.js, Express.js, REST APIs, Authentication, MVC Architecture

Databases MongoDB, PostgreSQL, Firebase
Core CS Data Structures and Algorithms, OOP, Problem Solving, System Design Basics
Tools: Git, GitHub, Postman, Netlify, Vercel, Render, Agile workflow

Projects

AidBloom | Charity Web App

March - 2025

Full-stack Developer

- Developed a full stack donation management platform supporting 1,000+ transactions with secure authentication and transaction workflows.
- Improved donation completion rate by 20 percent by simplifying user flows and optimizing onboarding experience.
- Reduced average page load time by 25 percent through backend query optimization and efficient data handling.
- Implemented authentication, later refactoring backend services to Node.js and Express.js for improved scalability.
- Collaborated with team members using Git based workflows to deliver features reliably and maintain code quality.

Technologant | Agency Landing Page

November - 2025

Front-End Developer | Next.js, Tailwind CSS, Framer Motion, Lucide Icons

- Built a responsive, modern landing page for an agency showcasing services, portfolio, testimonials, and contact form.
- Implemented smooth animations and interactive UI with Framer Motion to enhance user experience.
- Used Tailwind CSS for fast, consistent styling and Lucide Icons for clean, scalable visuals.
- Optimized for performance, SEO, and lead generation through Next.js server-side rendering.

Nordvia Exports | Lead Generation Commerce Website

January - 2026

Full-stack Developer | Next.js, TypeScript, Tailwind CSS, GSAP, Lenis

- Designed and developed a production ready product catalog and brand website focused on customer acquisition
- Built dynamic listings improving navigation and scalability
- Implemented smooth scrolling and animations to increase user engagement and time on site
- Structured codebase to allow future upgrades to ecommerce checkout and CMS integration
- Deployed and maintained application on Vercel

ShopSwift | Full Stack Ecommerce Web App

December - 2026

Full-stack Developer | MERN Stack

- Developed a full stack ecommerce platform with customer storefront and admin dashboard using MERN Stack
- Built REST APIs using Node.js and Express.js with MongoDB for products, users, and orders
- Implemented JWT and Google OAuth authentication with role-based access control
- Designed responsive UI using React, Next.js, Tailwind CSS, Lucide, and Lenis
- Deployed and managed production build on Vercel and Render

Education and Certifications

University of Gujrat – Gujrat, Pakistan (UOG)

2022-present

Bachelor of Science in Information Technology

CGPA: 3.13

Relevant Coursework: Data Structures, Algorithms, OOP, Database Systems, Web Engineering

RESEARCH WORK

Predictive Modeling of Gallstone Risk

December - 2025

Data Mining Assignment (IT-446) | Supervisor: Mr. Usman Zia

Tech: Python, Pandas, NumPy, DM & ML

- Coauthored research paper applying machine learning models and ensemble methods
- Performed data preprocessing, feature engineering, and K Fold cross validation
- Used Explainable AI techniques to interpret predictions
- Collaborated on analysis and technical documentation
