

HASAAN AZEEM

MERN Stack Developer

✉ hasaanazeem07@outlook.com | ☎ +923146802816 |  [Hasaan Azeem](#) |  [Hasaan Azeem](#)

PROFESSIONAL SUMMARY

Full Stack Engineer with hands-on experience building and shipping production-ready web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled at converting UI/UX designs into clean, reusable component-based interfaces while also designing scalable REST APIs and database schemas. Experienced with TypeScript, JWT/OAuth authentication, PostgreSQL, and performance optimization across desktop and mobile viewports.

TECHNICAL SKILLS

Front-end Development: Next.js, React.js (Hooks, Component-Based Architecture, State Management), Tailwind CSS, HTML5, CSS3, Bootstrap, Responsive Design
Backend & APIs: Node.js, Express.js, REST APIs, Python (FastAPI, Flask), JWT Authentication, OAuth
Databases: MongoDB, PostgreSQL, Firebase, SQL queries, NoSQL queries
Programming Languages: Python, JavaScript (ES6+), TypeScript,
AI Tools: Claude (Anthropic), ChatGPT, OpenAI Codex, Antigravity, GitHub Copilot
Deployment & Version Control: Git, GitHub, Vercel, Netlify, Render
Soft Skills: Logical thinking, algorithm implementation, system design fundamentals

EDUCATION

Bachelor of Science in Information Technology | 2022 - Present

University of Gujrat, Pakistan | CGPA: 3.13/4.0

PROFESSIONAL EXPERIENCE

Front-End Developer | Nordvia Exports Lead Generation Website

- Built fully responsive product catalog using Next.js and Tailwind CSS, with reusable components
- Deployed on Vercel with continuous deployment configured via GitHub for seamless updates
- Implemented TypeScript across components for type safety and maintainable code structure

Full Stack Engineer | ShopSwift E-commerce Web Application

- Built responsive React.js frontend with component-based architecture, converting UI designs into functional, reusable components
- Integrated REST API backend (Node.js/Express.js) with MongoDB query optimization
- Implemented JWT + OAuth 2.0 authentication and Stripe payment gateway across the checkout flow

Full Stack Developer | WebXGuard - Web Vulnerability Scanning Platform (FYP)

- Designed a distributed three-server web architecture (Flask auth server, FastAPI scanner, React.js frontend) with RESTful API integration and JWT-based authentication across services
- Designed a PostgreSQL schema (asyncpg) for storing scan results, user sessions, and APScheduler-driven automated reports, with indexed tables for high-frequency read operations
- Integrated Playwright-based web crawlers into the FastAPI scanner, automating security assessments across user-submitted targets and eliminating manual testing overhead for 5+ vulnerability categories

RESEARCH & ACADEMIC PROJECTS

Predictive Modeling of Gallstone Risk - Data Mining Research

December 2025 | Supervisor: Mr. Usman Zia

- Co-authored published ML research on gallstone risk prediction using Random Forest, XGBoost, and Explainable AI, contributing to data preprocessing, model evaluation, and technical documentation

CERTIFICATIONS & TRAINING

AWS Cloud Practitioner Essentials - Amazon Web Services (2026)
